

Overview

Week 3 builds on my Week 2 FinTrust work (Develop → Improve → Validate → Prepare for Final Integration). The goal is to turn my earlier analysis into a more complete, decision-oriented BI solution that is ready for Week 4 testing and presentation.

What This Week Covers

Part	Task
A	Review Week 2 work and identify at least 3 gaps
B	At least 8 additional SQL analyses (JOINS, CTEs, window functions, etc.)
C	At least 5 additional Python analyses or visualisations
D	Complete the Power BI dashboard (KPIs, trends, customer, transaction and risk-review views, slicers)
E	Validate at least 5 major findings
F	Write at least 5 evidence-based recommendations

Validation Approach

Initial Output → Test → Finding → Refinement → Re-test → Result

Deliverables

- Advanced SQL analysis
- Updated Python analysis
- Updated Power BI dashboard
- Validated findings and KPI analysis
- Testing and validation evidence
- Week 3 documentation and project summary

Tools

SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI, Jupyter, GitHub
